DESCRIPTION

Our communities have completely changed, and no one can be trusted anymore. We now live in the saddest environment possible, where a brother cannot trust his younger siblings, a mother cannot trust her children, not to leave out how a husband cannot trust his wife; because the word 'trust' has faded from everyone's minds.

However, what are the unusual events that have occurred, causing everyone to lose trust in one another? Everything turned upside down in a matter of minutes.

Many young people nowadays are lazy to earn as little as they labor, but they long to garner a large sum of money in a flash without doing anything. How is this possible? It will never happen because life is full of difficulties, and one must strive before one can earn as much money as one wants.

Of fact, ritual has become one of our seemingly primary sources of income. In order to obtain money, we murder friends, family, and others. Why? Are we forgetting that the people we killed were also human beings? If so, why do we act in such a heinous manner? Because what isn't good isn't good, and there isn't another name for it.

You simply choose to murder a fellow human being as a just act.

Even if you are a graduate, this does not imply that you should work in an office. A certificate is just a piece of paper; the work you choose will demonstrate how good, intellectual, and educative you are, not a certificate.

Your particular given name and families are, without a doubt, your first priority; don't try to taint them negatively, but rather strive to improve them.

Many of tomorrow's leaders have left our society (died). Others have morphed into something odd at this point. As though they've seen a ghost, everyone is immediately sprinting from each other. Let us, however, retain the peace within ourselves.

Truth be told, killing each other is not a good notion nor a viable choice. Because if we talk to people who engage in such behavior, they have nothing to justice their act other than "they're looking for money" they didn't work for.

As a young person, you must understand what you can do to help yourself. It's been a while since the current president of the federal republic of Nigeria, President Muhammadu Buhari, warned us that there are no more jobs for the youth. If you attended a federal university, a state institution, or the world's greatest university. You won't be able to find work. Because there are no vacancies in the federal government, state government, or even local government. He stated his case.

However, since our president has given us the truth, why are we still insisting on doing government jobs? He essentially encouraged those high ranking lecturers to return to farming, implying to the youth that farming is an alternative occupation for us to pursue.

On the 29th of January in the year 2022. At the tipper garage, I was at the peace hotel in Tanke. Nonetheless, one of my bosses requested that I should attend a conference. When I arrived, I noticed a large number of people waiting to enter the hotel at the entrance, but the gatekeeper refused to let them in. Which made me question, "what did I come here for?" However, after a few minutes, I learned that there are numerous meetings taking place in the vicinity.

Research & Reviews: Journal of Educational Studies

I approached the man and told him I was looking for a boss. He didn't give me an opportunity either, instead telling me to phone the person and he'd come and pick me up. When I called him, he dashed over to pick me up. "What are those individuals doing there, at the entrance?" I questioned as we walked in. They came for the conference as well, but it wasn't the same as ours. Okay.

Of course, the head of the conference about which I'm inquiring went to the gatekeeper and told him to let everyone in. I was taken aback since there were so many people there. It appeared as if all the kwara was present, but just a small portion of the state was. And the vast majority of them are students. This makes me sorry for our current educational methods. Because of the current state of education in Nigeria, you will need to work to support yourself and your parents while building your own particular career.

I and my boss went to our meeting, and once we finished talking, everyone else left, leaving only me and my boss.

Is it possible for us to attend the other conference as well, sir? No, we can't since they all have tickets to enter the hall and a number attached to it in their hands. As a result, we won't be able to do so.

I was left with the impression that not everyone in the state had arrived, and that millions of people remained. We came across such a destitute country. But, at the very least, we have hope because we exist.

Later, I had a conversation with a lady who assisted me in obtaining a ticket, and I entered. The hall was packed to the brim with people. The elderly, the young, and the children are all represented. I took a seat to learn more about the event. However, I realized that it is a part of a Youth organization, similar to selling and purchasing things, but they structured it in their own unique way.

There is no need to sell, buy, or stroll around to offer their product. However, they have their unique contact style. All they require is all of your phone's contacts, and you'll only have to pay 49,990. You will be a millionaire if your registration is completed.

However, I departed the location since I was no longer interested in their conversation.

Meanwhile, young people are in severe need of cash. However, rather than becoming a collector, aim to be a maker. Build your company from the ground up. Because it's far better to construct oneself than to be a slave to someone else.

However, staying beneath a person's roof can be sufficient at times, but be cautious.

Let us be wise, youths...scammers are around. If you want to invest, go to reputable sources rather than crooks. Be astute.

Dear young people, be serious and work hard to get a lot in life and gain many accolades for doing amazing things rather than being a waste of space within ourselves. Let us be wise. Ritual should not be a possibility doesn't ever consider it. Simply put in the effort to succeed and become your own capital you will be infinitely grateful you did.
